

Form-based Pastoral Care Invitational Education in S. C. Gaw

「級本導育啓發潛能教育」在青川

Invitation Educational was an inviting school model developed by William Purkey, which based on the principle of: Respect, Trust, Optimism and Intentionality.

Respect - we believe our students have the ability to bear responsibilities;

Trust - we believe that effective learning is based on mutual trust and communication;

Optimism - we believe our students have enormous potential waiting to be explored.

Intentionality - In order to initiate effective learning, we ought to create the suitable environment with **intention** together with **5 Ps: People, Place, Policy, Programme & Process**.

Since last year we have integrated invitational education into our Form-based Pastoral Care Educational Framework, which aims to enhance the cooperation between teachers, students and parents. With the collective effort of the school community, we intend to further promote the wholesome development of our students, by providing better facilities and more recreational area. Students will be exposed to more learning activities as well as opportunities for them to realize their talents and potential as well as to enrich their essential learning experiences. We hope that, the campus of TWGHs S. C. Gaw Memorial College will become the second home for our students, where they share their joy and tears with friends and teachers, where they learn, pursue their goals and cherish their dreams.
