Most important of all, the practice, the training, exercises and even the sweats in these days, you are making a difference to your life. You are trained to be a compassionate and loving young people. Have you ever thought of --- saying 'Good Morning', giving others a look that cares or just telling yourself "Yes, I can" --- It's hardly imagine in these simple things, you can give those in great difficulties or even yourself the courage and inspiration to overcome any challenges? It is easy to be a happy individual if we are more caring, more determined and more confident. It is the power to change yourself and make our world more beautiful. Students as from today, let's work together by making a difference in the lives of others and what I can assure is a more meaningful as well as fruitful life in front of you! Thank you.
